EDUCATION

Haldia Institute of Technology

Master of Computer Applications | CGPA: 9.02

Haldia, WB

Oct. 2024 – June 2026

Hijli College (Affiliated to Vidyasagar University)

Bachelor of Science (Honours) in Computer Science | CGPA: 7.90

Kharagpur, WB

Sep. 2021 – Aug. 2024

Nachipur Adibasi High School (H.S.)

Higher Secondary (WBCHSE) | Percentage: 82.40%

Keshiary, WB

July 2021

TECHNICAL SKILLS

Programming: Python, Java, C, SQL

Cloud: Amazon Web Services (AWS), Microsoft Azure

DevOps: Docker, Kubernetes, Jenkins, Git, Terraform

Monitoring: Prometheus, Grafana, Amazon CloudWatch

Web Development: React.js, Flask, HTML5, CSS3

Data Science: Pandas, NumPy, Matplotlib, Scikit-learn

Operating Systems: Linux (Ubuntu), Windows

Databases: MySQL, PostgreSQL

PROJECTS

Cloud Readiness & Migration Assessment | Cloud Architecture

- Conducted a cloud readiness assessment and designed a phased migration strategy with cloud maturity scoring and TCO/ROI analysis for an e-commerce application.

SRE Monitoring & Observability Implementation | AWS, Docker, CloudWatch, Prometheus, Grafana

- Designed and implemented an SRE monitoring solution using AWS CloudWatch, Prometheus, and Grafana.
- Configured dashboards, alerting rules, SLIs, SLOs, incident workflow, and monitoring for cloud infrastructure.
- Deployed and validated the solution on Amazon EC2 during the capstone project and documented the complete implementation with architecture and screenshots.
- GitHub:** github.com/milanrouth43/SRE-Implementation

Flight Price Prediction System | React, Flask, Python, Scikit-learn, Vercel, Render

- Developed a full-stack machine learning web application to predict flight ticket prices based on user travel details using a trained Scikit-learn regression model.
- Built a responsive React frontend integrated with a Flask REST API and deployed the application using Vercel (Frontend) and Render (Backend).
- Implemented an end-to-end machine learning workflow including data preprocessing, model training, REST API integration, and Git-based version control.
- Live Demo:** flight-price-prediction-project-xi.vercel.app • **GitHub:** [Repository](#)

Productivity Dashboard | HTML5, CSS3, JavaScript, Vercel

- Developed a responsive productivity dashboard integrating task management, daily planning, Pomodoro timer, weather updates, and motivational widgets into a single web application.
- Implemented interactive features using JavaScript, including real-time date and time, dynamic theme switching, and responsive user interface components.
- Live Demo:** productivity-dashboard-ashen-nine.vercel.app • **GitHub:** [Repository](#)

CERTIFICATIONS

- Capgemini Exceller Edge Fellowship Program** – Cloud & DevOps Training [Certificate](#)
- Introduction to Cybersecurity** – Cisco Networking Academy [Certificate](#)
- Anaconda Python for Data Science Professional Certificate** [Certificate](#)
